Shibarium DAO

WHITEPAPER 1.0

Shibarium DAO

Shibarium DAO is the first decentralized organization founded to develop a community on the Shibarium blockchain. In addition to creating the community itself, we are also creating a special place for them in the form of a decentralized community platform where they can feel completely free.

Shibarium DAO project consists of those 3 pillars:

MyShib

Decentralized Social
Media Platform

LockShib

Token Locker

RocketShib

Token Launchpad

Shibarium DAO

First on SHIBARIUM Network

MyShib - Decentralized Social Media Platform

MyShib is a groundbreaking platform that integrates the features of traditional web2 social media with the benefits of blockchain technology.

It is a fully decentralized platform hosted on InterPlanetary File System (IPFS) and is blockchain-driven, providing users with increased security, privacy, and control over their data. Users can mint their posts, earn tokens that they can use to donate to other users, and there is an encrypted chat feature for secure communication. The platform also uses \$SHIBDAO tokens, enabling users to participate in the platform's governance and decision-making process. Overall, MyShib is set to revolutionize the social media landscape, offering a truly decentralized and secure experience for its users.

**WILL BE
REVEALED**

Chubby Shibas **NFTs**

First 10 000 users who will connect their wallet to our platform will be able to mint one of our Chubby Shibas NFTs totally for free.

Chubby Shibas are a awesome looking profile picture collection which will give its owner permission to proudly call himself one of MyShib early adopters. Also they will look cool as PFP on every social media platform.

First on **SHIBARIUM** Network

LockShib - Token Locker

LockShib is a protocol for Ethereum and Shibarium blockchains that lets project founders lock their tokens. Founders can among others, lock their liquidity pool and team supply tokens. ShibariumDAO generates revenue from LockShib through lock fees. At the start, 50% of the fees will be allocated to buy-back and burns. Down the road, the percentage of fees allocated will be decided upon by the community. Overall, LockShib will make it easier for founders to create great projects on Shibarium blockchain.

RocketShib - Token Launchpad

Access to Top Tier Shibarium Ecosystem projects, before they hit the market. ShibariumDAO will select the best projects in the initial stages and help them get funding needed in order to complete them.

Only \$SHIBDAO stakers will have access to RocketShib, depending on the amount of \$SHIBDAO staked.

Tiers:

50k ShibDao, Tier One

100k ShibDao, Tier Two

250k ShibDao, Tier Three

Tier defines the amount of token available to be bought from launchpad by staker. All staked tokens need to be locked for at least 3 months to give permission to buy launched tokens. Staked tokens will generate rewards in \$SHIBDAO tokens.

Check Our Tokenomics

Total SUPPLY:

1 000 000 000 (100%)

Marketing:

40 000 000 (4%)

Airdrop:

10 000 000 (1%)

Initial liquidity:

800 000 000 (80%)

Rewards pool:

150 000 000 (15%)

TAX:

Buy 5% / Sell 5%

**50% OF TAXES GOES

Roadmap

Phase

1

- Setting Fundamentals
- Starting Social Media Channels
- Website 1.0
- Token Listing
- Website 2.0

Phase

2

- CoinGecko / CoinMarketCap Listing
- Whitepaper 1.0
- Marketing Expansion
- LockShib 1.0
- LockShib Contract Audit

Phase

3

- Partnerships establishing
- MyShib Demo
- MyShib 1.0 Launch
- Chubby Shibas NFT Free Mint

Phase

4

- Gathering community feedback
- MyShib 2.0 Launch
- Team Expansion
- RocketShib Launch
- CEX Listing
